

How to share content using ClickShare Button

1. Plug in the Button into your laptop (Windows or Mac). The white ring on the Button is filling up.
2. When the Button changes to static white, it's ready to share content.
3. Click the Button. Button LED changes to a static red and your screen is shared.

First time using a ClickShare Button ?

1. Plug in the Button into your laptop. The Button starts to flash white...

2. **Windows:** A window will open with two shortcuts. Click on "Open folder and view files". A second window opens, click on "Clickshare_for_Windows". Then the installation starts and the Button flashes until the installation is complete.

Mac: A new shortcut will appear on your desktop. Double click on this shortcut. A window will open, Click on "Clickshare_for_MacOSX". Then the installation starts and the Clickshare button flashes until the installation is complete.

On a mac, you also need to configure settings to allow the App to record the screen :

1. Open "System Preferences", "Security & Privacy" and finally "Privacy".
2. In the "Screen Recording" section enable the checkbox next to ClickShare
3. In the "Accessibility" section, enable the checkbox next to ClickShare
4. The button then turns static white. This means that Clickshare is installed on your computer.
